

HPE GEEK SQUAD

**Do you love computers and technology?
Do you enjoy fixing things and helping people?
Do you want to learn how to trouble-shoot technical issues that come up in your class?
Do you have a curiosity for the way things work?**

If you answered yes, consider joining the HPE Geek Squad!

Fourth and fifth grade students in the 21C Tech Club are invited to participate as HPE Geek Squad members (or technology experts) for the 2016-2017 school year.

Duties include: trouble-shooting simple technical issues as they arise in class with PCs, laptops, Venues, and/or iPads, printers, as well as screen projectors and document cameras, and/or other electronic items. You may also be consulted for your expertise in navigating many of the digital learning systems and applications we use at High Plains.

Student participation will be based on good behavior, current academic standing, and subject to teacher approval.

There will be a student interest meeting on Monday, September 19 at lunchtime. Bring your lunch to the library for information and a tech troubleshooting activity.

As a Geek Squad member, each student is required to:

1. Successfully complete a 21-question test for certification.
2. Maintain a classroom tech solution log and bring it to meetings for discussion.
3. Display your Help Desk placard at your seat at all times.
4. Attend all Geek Squad meetings to build up your trouble-shooting skills.
5. Help trouble-shoot technical issues as they occur in your classrooms.

If you are interested in being a certified HPE Geek Squad member, please fill out the application (on reverse) and return it to the library office (Mrs. Edgar).

I am looking forward to working with you!

Sincerely,

Mrs. Edgar
